modular energy source for your mission

- **plug-and-fly**
- one aircraft with different types of energy sources
- replacable without maintenance action

Aero 26

Battery Electric

- zero emissions
- 2 hours endurance
- quiet performer

Range Extender

- 800 km range
- 4 hours endurance
- fast turnaround
- low CO2 taxes

modular energy source for your mission

- **plug-and-fly**
- one aircraft with different types of energy sources
- replacable without maintenance action

Aero 26

Battery Electric

- zero emissions
- 2 hours endurance
- quiet performer

Range Extender

- 800 km range
- 4 hours endurance
- fast turnaround
- low CO2 taxes

Fuel Cell

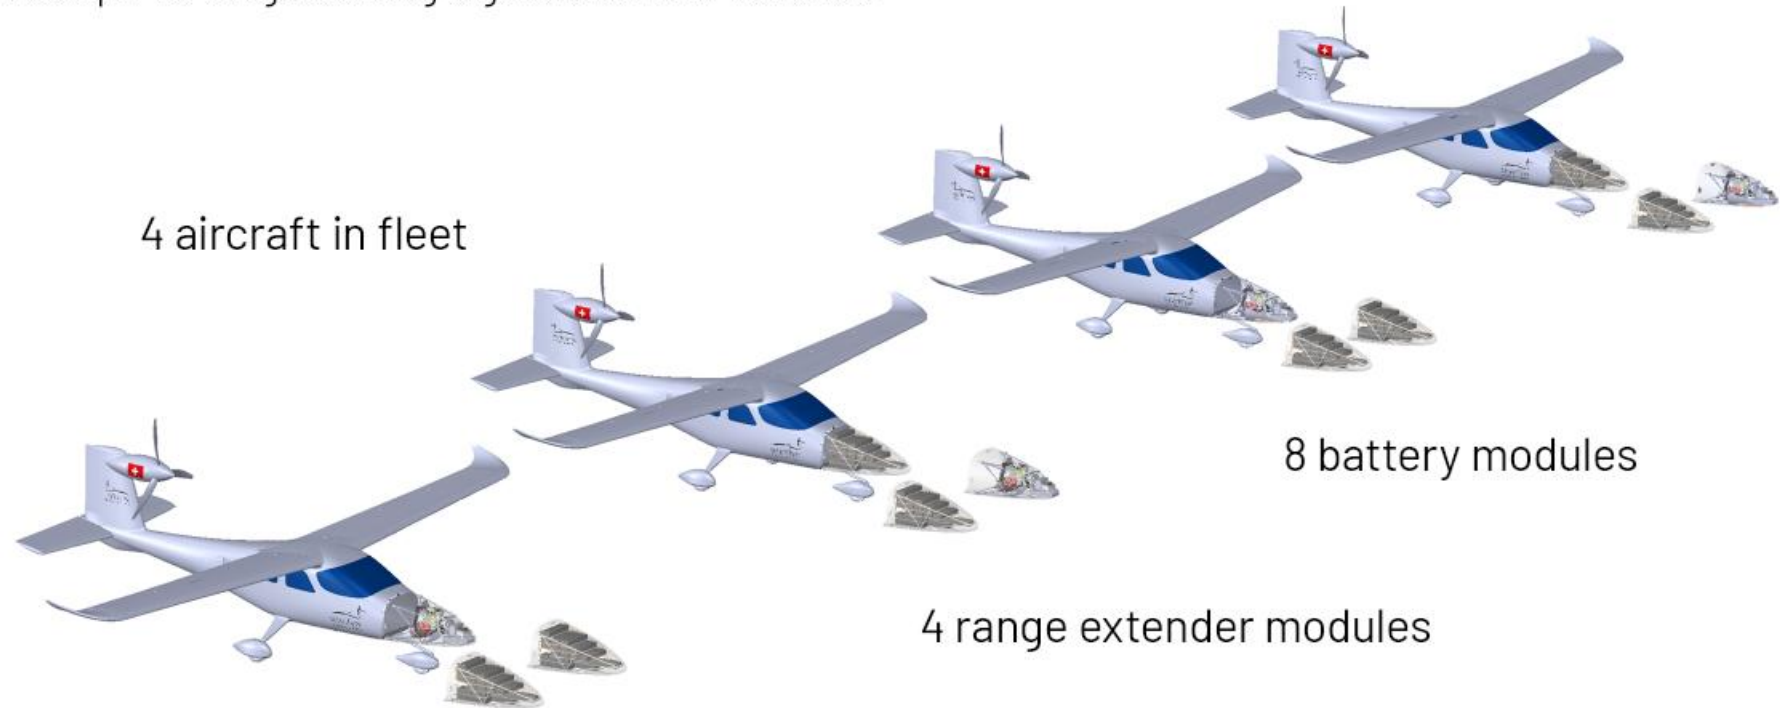

- sustainable
- 4 hours endurance

modular energy source for your flexibility

- **high operational availability**
- **aircraft can be operated with various energy modules**
- **battery-electric for flights in airport vicinity, hybrid-electric for navigation flights**
- **Range Extender goes as own system to maintenance visit**

Aero 26

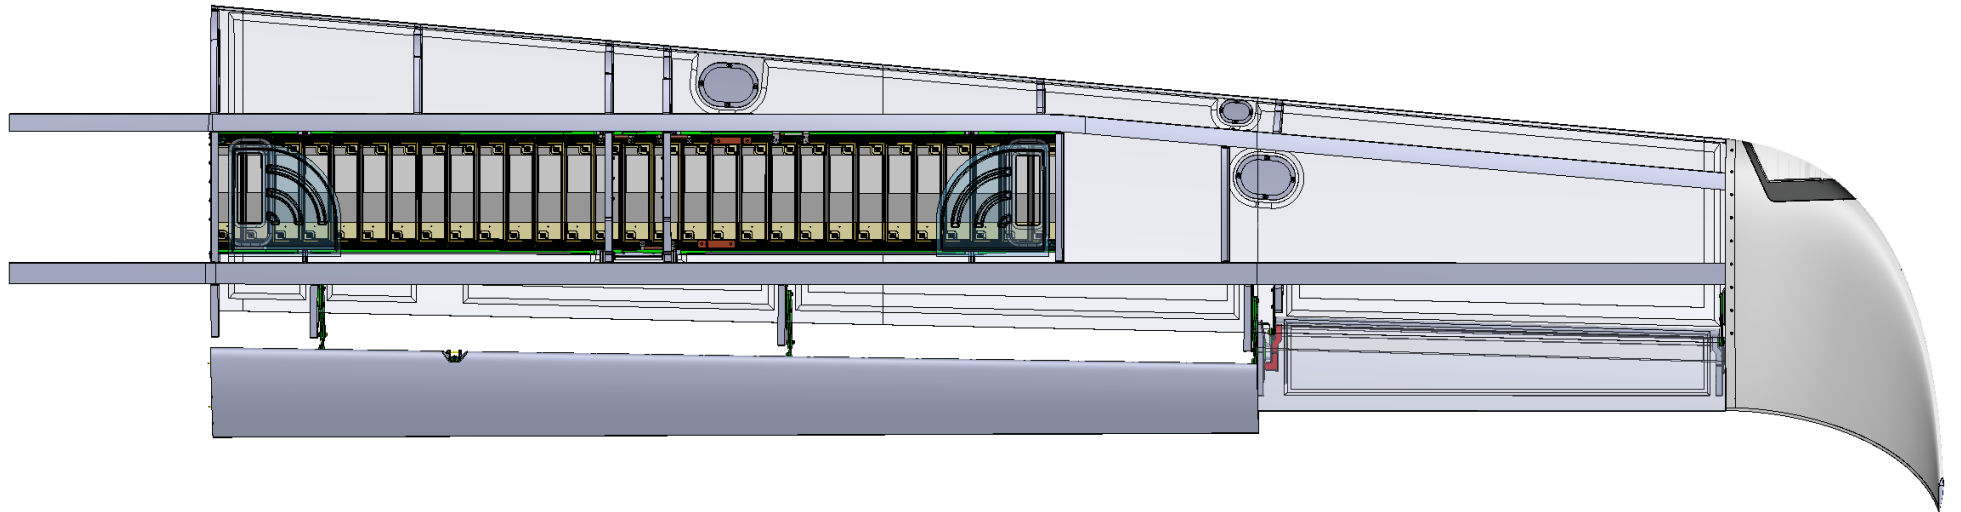

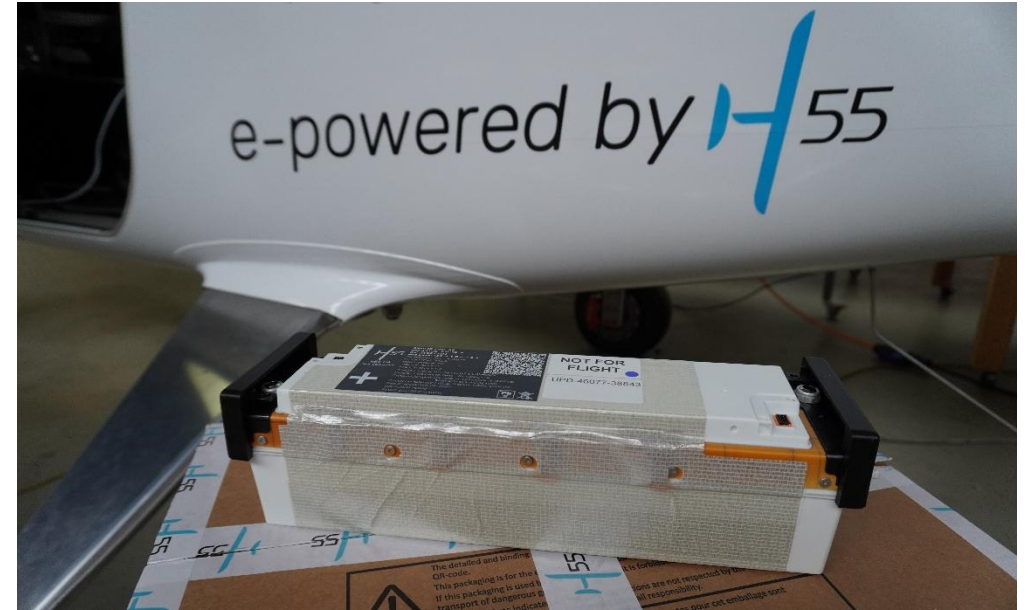

Example for a flight training organization with 4 aircraft:

the battery

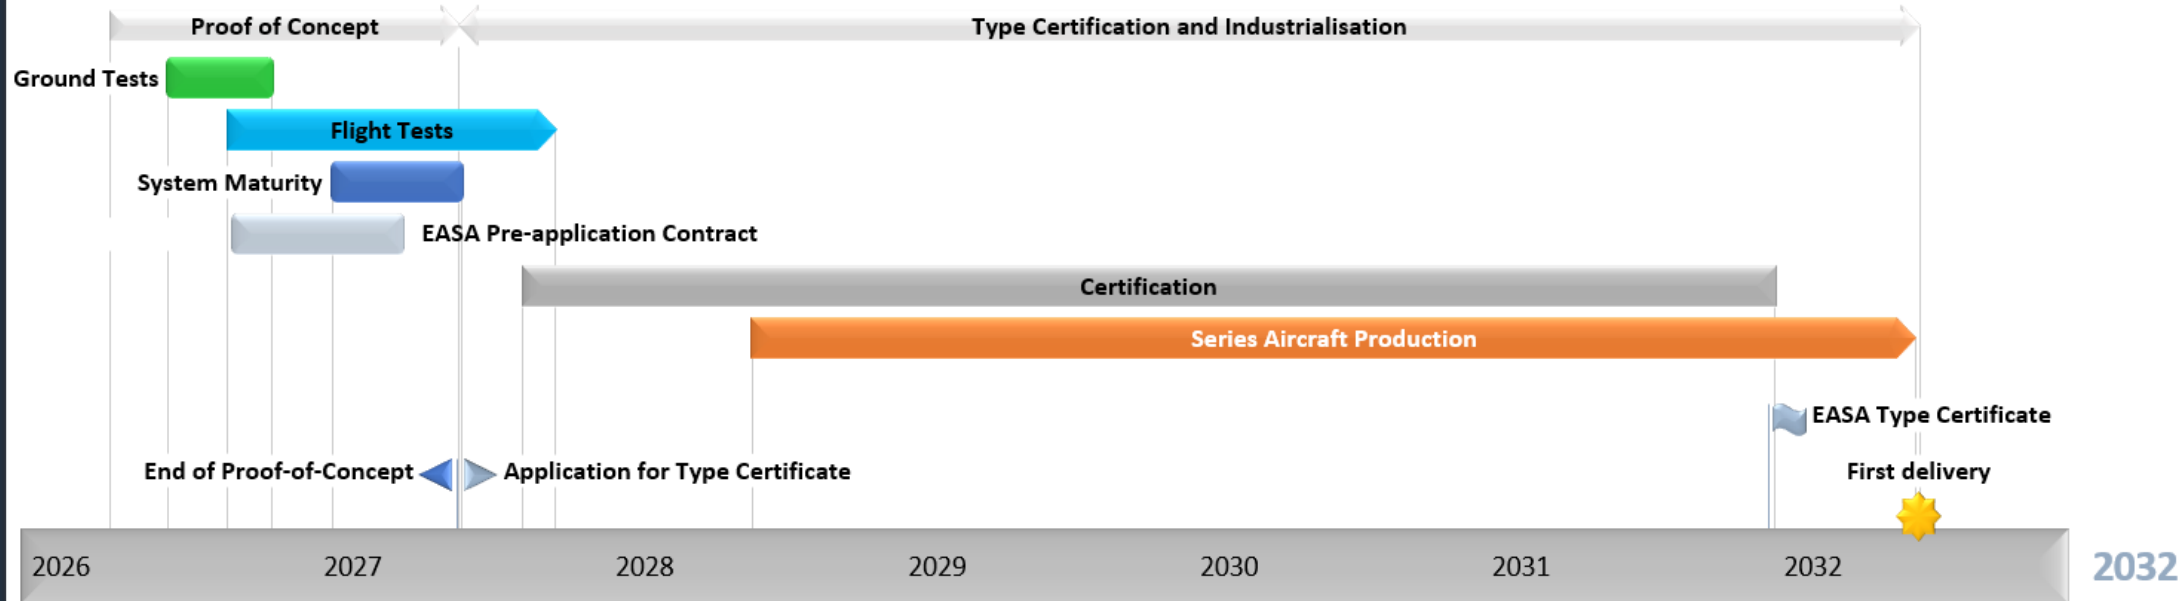

- **Battery Module Adagio 180 by H55**
- 29 battery modules per wing (58 BM's)
- Voltage max. 487 V, nominal 417 V
- integrated system weight: 220 kg
- energy density: 160 Wh/kg

Aero 26

roadmap to market
