

AERO Drones: The meeting place for unmanned aircraft

- **AERO Drones on the first three days of AERO**
- **Renowned exhibitors and top-class conference program**
- **New location for AERO Drones in Hall B4**

Friedrichshafen – The successful “trade fair within the trade fair” AERO Drones will continue to fly on its successful course at AERO 2025. This year, it will find a new home in Hall B4 on the first three days of the annual show.

Unmanned aerial vehicles (UAV) are an integral part of our society. Civilian drones have taken on a variety of tasks in all areas of life, from agriculture and rescue services to leisure activities and special tasks for authorities and organizations with security tasks. AERO Drones reflects the wide range of applications. It will take place as a “trade fair within a trade fair” from April 9 to 11, 2025 as part of the AERO (April 9 - 12, 2025) in Friedrichshafen.

Due to popular demand, AERO Drones will be located in Hall B4 for the first time this year. This location not only offers more exhibition space, but was also chosen to ensure proximity to the helicopter hangar in Hall B5. Helicopter operators are often also drone operators and share the same airspace. The move of AERO Drones to Hall B4 thus enables an even more efficient exchange between existing and potential operators and manufacturers.

Tobias Bretzel, AERO show director at fairnamic GmbH, says: “We are delighted to be able to continue our partnership with the Baden-Württemberg police at AERO Drones this year. The importance of drones is constantly increasing, which is also reflected in the growing interest in the three-day special trade fair within the trade fair. We are also delighted to have found another strong partner in the THW (Technisches Hilfswerk), which has extensive experience in the operation of unmanned aerial vehicles.”

Martin Landgraf, Head of the Baden-Württemberg Police Helicopter Squadron, says: “The exchange with other operators of unmanned systems is of great importance to us as the Baden-Württemberg Police Helicopter Squadron. AERO

Drones at AERO provides us with a very efficient way of doing this. We are delighted to be a partner of AERO Drones again.”

Among the exhibitors who have already confirmed their participation in AERO Drones are Droniq GmbH, Securiton, the Bavarian Red Cross (BRK), M4.com, Droneparts, Skyeforge AG, Bormatec and DroneControl.

At the AERO Drones Stage in Hall B4, the organizers will be offering an extensive program of lectures and presentations on issues relating to unmanned aviation that are of interest not only to drone professionals.

About AERO:

AERO 2025 will take place from April 9 - 12, 2025 at the exhibition grounds of Messe Friedrichshafen. AERO is the leading international trade fair for general aviation, business aviation and air sports. Aircraft ranging from civilian drones to gliders, microlights and gyrocopters, helicopters, touring and training aircraft with piston engines or turboprop engines and business jets will be on display. New propulsion systems, electric flight, state-of-the-art avionics, services and accessories for pilots are further focal points. These topics are also reflected in the AERO Conferences, making Europe's largest general aviation event an important platform for knowledge exchange and further training. The date of AERO 2026 has already been set: it will take place from April 22 to 25, 2026.

About fairnamic GmbH:

With the founding of fairnamic GmbH, the Frankfurt and Friedrichshafen trade fair companies sealed a partnership with a focus on innovative mobility. Combined expertise, market knowledge, global positioning, brand strength and speed will strengthen the market position in the future markets of general aviation, micromobility, e-bikes and bicycles. The AERO and Eurobike brands and their satellites form the focus of the joint venture. The aim is to expand and further develop the two leading trade fairs.
